Growing demand

Few viable alternatives

Clinical technology pressures

Uneven resource allocation

Poor integration

Underinvestment

Volume...not value
Health Care Funding Pressures

Aging population
Population increase
Increasing incidence of chronic disease
Wait lists increasing
Government funding flat
Aging IT
Future State

**WHAT WE WANT TO ACCOMPLISH IN 3-5 YEARS**

- People are empowered to manage their own health and wellness.
- People are supported in their choices near end of life.
- The majority of health needs are met at home and in the community.
- Hospitals are there to deliver specialized care that cannot be provided in the community.
- Timely access to appropriate surgical services.
- Enhanced clinical information systems within and across the continuum of care.
- Value is rewarded through aligned incentives.
- Expanded access to care through telemedicine.
