

## Vancouver Acute outpatient clinics going live with VGH on November 5, 2022

Vancouver General Hospital (VGH) campus is the next major acute site scheduled go-live with CST Cerner on Saturday, November 5, 2022. The first activation cycle includes acute care, associated clinical services (i.e. pharmacy, medical imaging and lab) and approximately 50 priority clinics. Following the initial activation of VGH and the first group of clinics, the remaining clinics will go live in cycles. A staggered go-live approach was selected for VGH as it takes into account available resources and lessons learned from previous activations.

The outpatient clinics going live with acute, in the first activation cycle, are:

DHCC	VGH/Willow	ECC/SCC	Surgery	Diagnostics
<ul style="list-style-type: none"> <li>• Adult Metabolic</li> <li>• Complex Wound Clinic</li> <li>• Diabetes</li> <li>• ENT Clinic</li> <li>• Epilepsy Clinic</li> <li>• Infectious Disease Clinic</li> <li>• Minor Surgery</li> <li>• Post Transplant Clinics</li> <li>• Pulmonary Hypertension Clinic</li> <li>• Stroke Prevention</li> <li>• Stroke Rapid Access</li> <li>• Transplant Pre-Assessment, Donor</li> <li>• Dermatology Rapid Access</li> <li>• Infectious Disease Clinic</li> <li>• Rapid Access Acute Neurology</li> <li>• Rapid Access Geriatrics Clinic</li> <li>• Rapid Access Internal Medicine Clinic</li> <li>• Rapid Access Gynecology Clinic</li> </ul>	<ul style="list-style-type: none"> <li>• Apheresis Unit Cell Separator</li> <li>• Bone Marrow Transplant Daycare</li> <li>• Bone Marrow Transplant Doctors Clinic</li> <li>• Colon Screening Program (Endoscopy)</li> <li>• General Hematology Clinic</li> <li>• Hematology Daycare Apheresis Unit</li> <li>• Hyperbaric Unit</li> <li>• Medical Infusion Clinic</li> <li>• Vascular Access/IV Program</li> <li>• Renal Hemodialysis Nocturnal/Home</li> <li>• Renal Hemodialysis Unit</li> <li>• Renal Kidney Clinic</li> <li>• Renal Peritoneal Dialysis Unit</li> <li>• Renal Vascular Access Clinic</li> <li>• Respiratory Ambulatory Unit</li> <li>• Thrombosis Clinic</li> <li>• Long Term Follow Up Clinic</li> <li>• ECT Treatment and Mood Disorders</li> </ul>	<ul style="list-style-type: none"> <li>• Ophthalmic Photography Sec F</li> <li>• Photodynamic Therapy Sec F</li> <li>• Treatment Room Section E</li> <li>• Vision Rehabilitation Sec M</li> <li>• Visual Fields Section J</li> <li>• Oncology Section K</li> <li>• Ophthalmology Outpatient Clinic Sec E</li> <li>• SCC - Psoriasis Phototherapy Clinic</li> </ul>	<ul style="list-style-type: none"> <li>• Cardiac Cath Lab</li> <li>• Daybed</li> <li>• Electrophysiology</li> <li>• ECC OR</li> <li>• Preadmission Clinic</li> <li>• Cardiac Intervention Recovery Unit</li> </ul>	<ul style="list-style-type: none"> <li>• Echocardiology – DHCC</li> <li>• Echocardiology – VGH</li> <li>• Echocardiology – UBC</li> <li>• Electrocardiography – VGH</li> <li>• Electrocardiography – DHCC</li> <li>• Electrocardiography – UBC</li> <li>• Electroencephalogram – VGH</li> <li>• VGH Cardiac Device Clinic (pacemaker clinic)</li> <li>• UBC Cardiac Device Clinic</li> <li>• EMG (neuromuscular clinic)</li> <li>• Neuro Otology</li> <li>• Pulmonary Function Lab</li> <li>• Vascular Lab</li> </ul>

Note: If a clinic is not listed in the above table, it is not currently scheduled to go-live on November 5, 2022.

These clinics were identified because of technical integration requirements and lessons learned from previous activations. Onboarding the remaining clinics in cycles (small go lives) allows for more focused design to meet each clinic's unique needs and allows for continual learning and process improvement as teams roll through clinics. We will share more information about timing as soon as it becomes available.
