

Process for COVID-19 Enhanced Student/Instructor Screening for Long Term Care at Vancouver Coastal Health and Providence Health

1. For students/instructors who are new to the facility or have not worked there in 14 days, they are required to fill the form out.
2. Students who are on an instructor led clinical are to fill it out the form three business days prior to the start of their practicum and submit it to their instructor.
3. Once the instructor has collated the students' forms, they email the completed forms (including their own) to the manager or delegate of the facility three business days prior to the start date of the practicum.

If there is a student who will not be on site with an instructor, they should complete the form and email it directly to the manager or delegate three business days prior to the start of the practicum.

4. If the student answers "YES" to any questions they should notify their instructor and call VCH Public Health prior to starting clinical. They cannot start clinical until cleared by Public Health.
5. Students and instructors cannot attend clinical unless the form is complete.
6. Students and instructors should be prepared to be screened again prior to entering the facility.
