

**School-Age Immunization Coverage
Table Definitions (2017-2018 Academic Year)
Vancouver Coastal Health**

KINDERGARTEN

TDaP-Polio (DTaP_P)	The number of students enrolled in kindergarten as of June 30, 2018 who received at least their fourth or fifth dose of diphtheria/ tetanus/ acellular pertussis-containing vaccine given on or after age the 4 th birthday and at least the third dose of polio containing vaccine on or after the 4 th birthday.
Measles	The number of students enrolled in kindergarten as of June 30, 2018 who received two valid doses of measles-containing vaccine by June 30, 2018. Valid doses must be given on or after the first birthday with a minimum of 28 days between doses.
Mumps	The number of students enrolled in kindergarten as of June 30, 2018 who received two valid doses of mumps-containing vaccine by June 30, 2018. Valid doses must be given on or after the first birthday with a minimum of 28 days between doses.
Rubella	The number of students enrolled in kindergarten as of June 30, 2018 who received at least one valid dose of rubella-containing vaccine by June 30, 2018. Valid dose must be given on or after the first birthday.
Varicella – One Dose (VARICELLA1)	The number of students enrolled in kindergarten as of June 30, 2018 who received at least one valid dose of varicella vaccine, reported previous disease or protective antibody levels by June 30, 2018. Valid dose must be given on or after the first birthday.
Varicella – Two Doses (VARICELLA2)	The number of students enrolled in kindergarten as of June 30, 2018 who received at least two valid doses of varicella vaccine, reported previous disease or protective antibody levels by June 30, 2018. Valid doses must be given on or after the first birthday.
Meningococcal C (MENC)	The number of students enrolled in kindergarten as of June 30, 2018 who received one valid dose of meningococcal C-containing conjugate vaccine. Valid dose must be given on or after the first birthday.
Hepatitis B (HBV)	The number of students enrolled in kindergarten as of June 30, 2018 who received a completed series of hepatitis B-containing vaccine (3 doses).
Up-to-date from one dose of varicella (UTD1)	The number of students enrolled in kindergarten as of June 30, 2018 who received all completed series of DTaP-P, measles, mumps, rubella, varicella-previous disease/one doses of varicella, meningococcal C and hepatitis B.
Up-to-date from two doses of varicella (UTD2)	The number of students enrolled in kindergarten as of June 30, 2018 who received all completed series of DTaP-P, measles, mumps, rubella, varicella-previous disease/two doses of varicella, meningococcal C and hepatitis B.
Zero dose (ZERO)	The number of students enrolled in kindergarten as of June 30, 2018 who did not have any immunization records. This figure includes children who may be immunized but the records have not been provided to us, and children who have not received vaccines for other reasons.

GRADE 6

Hepatitis B (HBV)	The number of students enrolled in grade 6 as of June 30, 2018 who received a completed series of hepatitis B-containing vaccine (3 doses if the series was started before 10 years and 8 month of age; 2 doses if the series was started on or after 10 years and 8 months of age).
Varicella (VARICELLA)	The number of students enrolled in grade 6 as of June 30, 2018 who received two valid doses of varicella vaccine, reported previous disease or protective antibody levels by June 30, 2018. Valid doses must be given on or after the first birthday and with at least 4 weeks between doses.
HPV	
Female Students (HPV_F)	The number of female students enrolled in grade 6 as of June 30, 2018 who received at least two valid doses of human papillomavirus (HPV) vaccine.
Male Students (HPV_M)	The number of male students enrolled in grade 6 as of June 30, 2018 who received at least two valid doses of human papillomavirus (HPV) vaccine.
Zero dose (ZERO)	The number of students enrolled in grade 6 as of June 30, 2018 who did not have any immunization records. This figure includes children who may be immunized but the records have not been provided to us, and children who have not received vaccines for other reasons.

GRADE 9

TDaP (DTaP)	The number of students enrolled in grade 9 as of June 30, 2018 who received a primary series of tetanus/diphtheria/acellular pertussis-containing vaccine (3 doses) and received at least another dose of tetanus/diphtheria/acellular pertussis vaccine on or after 10th birthday.
HPV	The number of female students enrolled in grade 9 as of June 30, 2018 who received at least two valid doses of human papillomavirus (HPV) vaccine.
Meningococcal Quadrivalent Conjugate (MENQ)	The number of students enrolled in grade 9 as of June 30, 2018 who received 1 dose of meningococcal quadrivalent conjugate vaccine on or after 11 years and 8 months of age.
Zero dose (ZERO)	The number of students enrolled in grade 9 as of June 30, 2018 who did not have any immunization records. This figure includes children who may be immunized but the records have not been provided to us, and children who have not received vaccines for other reasons.

7 Years Birth Cohort

TDaP (DTaP)	The number of kids born in 2010 with active records in PARIS and who received at least their fourth or fifth dose of diphtheria/ tetanus/acellular pertussis-containing vaccine given on or after the 4 th birthday.
Polio (Polio)	The number of kids born in 2010 with active records in PARIS and who received at least the third dose of polio-containing vaccine on or after the 4 th birthday.
TDaP - Polio (DTaP_P)	The number of kids born in 2010 with active records in PARIS and who received at least their fourth or fifth dose of diphtheria/ tetanus/acellular pertussis-containing vaccine given on or after the 4 th birthday and at least the third dose of polio-containing vaccine on or after the 4 th birthday.
Measles	The number of kids born in 2010 with active records in PARIS who received two valid doses of measles-containing vaccine by June 30, 2018. Valid doses must be given on or after the first birthday with a minimum of 28 days between doses.
Mumps	The number of kids born in 2010 with active records in PARIS who received two valid doses of mumps-containing vaccine by June 30, 2018. Valid doses must be given on or after the first birthday with a minimum of 28 days between doses.
Rubella	The number of kids born in 2010 with active records in PARIS who received at least one valid dose of rubella-containing vaccine by June 30, 2018. Valid dose must be given on or after the first birthday.
Varicella – One Dose (VARICELLA1)	The number of kids born in 2010 with active records in PARIS who received one valid dose of varicella vaccine, reported previous disease or protective antibody levels by June 30, 2018. Valid dose must be given on or after the first birthday.
Varicella – Two Doses (VARICELLA2)	The number of kids born in 2010 with active records in PARIS who received two valid dose of varicella vaccine, reported previous disease or protective antibody levels by June 30, 2018. Valid dose must be given on or after the first birthday.
Hepatitis B (HBV)	The number of kids born in 2010 with active records in PARIS who received a completed series of hepatitis B-containing vaccine (3 doses) .
Up-to-date with one dose of varicella (UTD1)	The number of kids born in 2010 with active records in PARIS who received all completed series of TDaP, Polio, measles, mumps, rubella, varicella-previous diseases/one dose of varicella and hepatitis B.
Up-to-date with two doses of varicella (UTD2)	The number of kids born in 2010 with active records in PARIS who received all completed series of TDaP, Polio, measles, mumps, rubella, varicella-previous diseases/two doses of varicella and hepatitis B.

Notes:

- A coverage rate was suppressed if classes have 5 or fewer children, or 5 or fewer girls for HPV (coverage is shown as Not Available "NA" in the table).
- The zero dose rate was suppressed if 5 or fewer children were unimmunized (coverage is shown as Not Reported "NR" in the table).
- **Exercise caution when comparing the overall trends due to ongoing changes in data collection methods, vaccination schedules and definitions.**
