The Intensive Collaborative Arthritis Program (ICAP) helps participants and their family members live well with arthritis.

Participants attend frequent sessions to:

- Learn about the disease process and treatment options
- Learn strategies for coping with chronic pain related to your arthritis
- Improve mobility and strength
- Improve function and activity level
- Learn to protect joints and manage fatigue
- Learn about community resources
- Develop a positive attitude towards living with arthritis

**Who participates?**

This program is suited to adults who have Complex Inflammatory Arthritis and Systemic Autoimmune Rheumatic Diseases (SARDs) requiring intensive treatment by a team of health professionals.

Together with your Rheumatologist or health professional, you can decide if the Intensive Collaborative Arthritis Program meets your needs.

**Teamwork**

Managing arthritis requires teamwork.

You are the team’s key player.

**Rheumatologists:**
- Diagnose your condition(s), prescribe medications and other treatments, and act as a medical resource to the team.

**Nurses:**
- Provide education about your arthritis diagnosis, medications and how to manage your symptoms and healthy living.

**Physiotherapists:**
- Assess pain, movement, strength, and functional ability and provide treatment, which includes exercise, education and self-management strategies. They promote active living and help you connect with local resources in your community.

**Occupational therapists:**
- Assess your ability to perform everyday activities and help modify activities and provide strategies to reduce your pain, fatigue, and improve function.

**Social workers:**
- Connect you and your family with support groups and other community resources, and help with life challenges such as depression, housing, finances and employment.

**Change in Condition**

If your condition worsens while waiting for treatment, we suggest calling your doctor.

**Appointments**

- The Intensive Collaborative Arthritis Program runs Monday to Friday from 8 am to 4 pm.
- You will be expected to attend the program 2-3 days per week for 4-6 consecutive weeks.
- The number of appointments will vary but averages 3 to 4 hours per day.
- You will be called by phone with your first appointment time.
- When you arrive at the Centre the first day, go to the admissions desk on the first floor to report in. You will need your personal health care card.
- Your first visit will take about 2 hours. During the first 2 days you will be assessed by all team members and attend a team meeting to discuss your treatment plan and goals.
- Bring a list of your medications, previous surgeries or other health issues.
- If you have difficulty with English, please bring someone who can help you.

**What to wear:**
Comfortable clothing such as:
- A track suit
- A loose fitting blouse/shirt
- Loose pants or shorts
The Mary Pack Arthritis Program also offers:

- Paediatric clinics in Victoria and Penticton
- Travelling Consult Service across BC by Rheumatologists
- Specialty medical clinics
- Outpatient programs for adults in Vancouver, Victoria, Penticton and Cranbrook
- Occupational Therapy outreach clinics in select rural communities in BC
- Free education classes for clients (*no referral required)

Referrals are required for all assessment and treatment services. For more information on arthritis treatment programs, call:
