Why Choose Us:

We have a unique capacity. Our production facility is huge. We have wood, metal, upholstery and other manufacturing facilities located in several thousand square feet in 2 locations. We stock a huge range of materials and supplies for all aspects of custom seating, mobility and positioning. We are dealers for all major lines of products for mobility and seating, and carry a large inventory of supplies. We pride ourselves in a quick turnaround. A high complexity full molded seating device can be produced in 2 days from specification to final

delivery. We have a creative approach where others will say "It cannot be done." For clients in the Lower Mainland who need a new mobility device as well as seating, we request that we provide both mobility and seating.
