Why Choose Us:

Our motto is "Total Care" meaning that we are not just looking at the injury/ disability itself but at the entire person and how the injury/disability affects all areas. Assessing the needs of the entire body and matching the client up with the device(s) that best meet their physical (& financial) needs. Consultant(s) onsite that are very knowledgeable of all products both from work experience and personal experience. Staff is experienced in working with all funding agencies. Due to our unique setting and methods we are able to "tailor" or "modify" devices to make them meet the specific needs of even the most unusual cases – very rarely do we fit products "off-the-shelf".
