

## Metro Vancouver Beach Water Quality

Metro Vancouver area beaches are monitored weekly throughout the swimming season as a geometric mean over the most recent 30 days. Guidelines recommend a level of  $\leq 200$  E.coli/100 mL bacteria for primary contact recreational activities. When the geometric mean exceeds this amount, an assessment will be made to determine possible health risks and possibly post a warning sign indicating, "This water is contaminated and is unsafe for swimming".

Area - Updated: December 28, 2017	Beach	Geometric Mean
English Bay	English Bay	62
	Sunset	74
