

Vancouver Coastal Health works with local governments and other agencies to monitor beach water quality throughout the swimming season. Canadian Recreational Guidelines recommend a geometric mean of less than 200 E.coli/100ml or a single sample less than 400 E.coli/100ml. When these numbers are exceeded, a Medical Health Officer will make a health risk assessment usually resulting in the posting of an advisory notice or additional sampling in the case of a single high count.

Area	Beach	Geometric Mean (Ecoli MPN/100mL)	Calculated On
West Vancouver	Ambleside	21	September 29, 2022
	Dundarave	14	September 29, 2022
	Sandy Cove	11	September 29, 2022
	Eagle Harbour	17	September 29, 2022
	Whytecliff Park	10	September 29, 2022
English Bay	Third	10	September 29, 2022
	Second	11	September 29, 2022
	English Bay	15	September 29, 2022
	Sunset	23	September 29, 2022
